FOURTH GENERATION NURSERY INCORPORATED

"Your One Stop Water Gardening Source"

Greetings!

It is time for a new plant catalog. Mainly because we've got some new plants! (and also the printing and graphic arts people need to make a living too). We're pleased with early sales of our two

Iris introductions ('Freckles' and 'E. L. Francis') and with the fact that both survived the strange winter of '07 in great shape – we did lose some or all of several "Louisiana" type Iris hybrids and have had to delete several of them. We now offer 22 varieties of Hardy, Northern grown Aquatic Iris yielding a good range of color over a 12-week period!

We also offer over 50 varieties of Hardy Water lily and look forward to introducing our newest hybrid (Nymphaea 'Cliff Tiffany') during summer '08! Stay tuned for details and pictures of that release. We've listed several other new marginals (and deleted or listed several others as "illegal in..."). Also new this year to our catalog is a listing of some of our Hosta (over 100 varieties as of today), Grasses etc. We have lots of other "goodies" too but in limited quantities – "check for current availability".

From our vantage point, it is clear that offering a wide variety is one of the keys to success. It would be far simpler from a production standpoint to focus on only a few varieties in each category but the consumers (and the better designers & installers that serve them) are not satisfied with generic red, white, pink and yellow. Whether Water lilies or Hosta, better selection equals better sales. Simply advertising how many varieties you have to choose from would seem to draw as many customers as some large discount might (and last I knew, discounts never increased anybody's profit margins, but then I'm a little bit old-fashioned). We've got the selection to support you from the first sign of spring to the first winter snowfall.

Another continuing trend is clearly toward larger ponds. This isn't the '90's and most ponds today are a lot larger than 5' x 10'. Our standard Water lily is well-established in a 9" x 6" pan and yields an attractive plant 2-3' across but larger ponds call for larger plants and we have seen sales of older, larger plants increase significantly. We now offer clumps (usually 3 eyes) suitable for planting pockets (or 16-23" containers) that quickly yield a much heavier (3-7' spread) plant – far more esthetically pleasing in those larger ponds. Stocking some larger plants should be a part of your marketing plan, but we're here to support all those special orders as well as to re-supply you throughout the season.

If you haven't visited our nursery in the past several years, Shame on You!!! After adding two more greenhouses in '04 & '05, in '06-7 we totally remodeled our main production house – new heating and pools, rolling benches – more space for more better plants earlier in the season (it may be poor grammar but its good horticulture, and better plants earlier means more \$\$\$ for you and for us). I think you'll agree – it's a good thing and I hope we'll have the pleasure of showing you at first hand during the spring.

TERMS & CONDITIONS

Terms: Initial purchase will be COD. Our business is growing plants not lending money, but we will extend net 30 terms with an approved credit application. If paying by credit card, payment must be made before order ships.

Delivery: We offer regular, scheduled delivery routes. Truck deliveries that are plants or fish only will be charged for delivery. Please inquire as to how you can qualify for free delivery. Special orders and UPS Shipments will be charged for cost plus handling.

UPS: Orders received by 10 am Monday – Thursday usually ship same day. Potted plants and Fish are not UPS'able.

Pick-Up: We request 24 hour advance notice to ensure adequate service. Some items are stored at our off-site warehouse. Avoid delays and let us know ahead of time what you need.

Returns: The products we sell are warranted by the manufacturer and, as such, credit will only be given for merchandise that meets the individual manufacturer's criteria for returns. We will issue an RMA# for any merchandise that has failed under manufacturer's warranty. Warranty periods vary greatly from item to item ranging from 0 days on a quartz tube to 5 years (if registered) for some pumps so be sure the item is truly under warranty. Credit or replacement will be issued upon the manufacturer's approval. It is your responsibility and expense to ensure that an item reaches us while still under warranty. Please exercise due diligence to ensure that product has in fact failed – gravel, wood chips or fish lodged in an impeller is not a warranted defect! ALL items returned require a dated original sales receipt, written description of the problem, and an RMA#.

Non-defective merchandise may be returned subject to approval and, as such, will require an RMA#. Merchandise must be in its original un-priced and unopened packaging and will be assessed a restocking charge before credit is issued. A 15% restocking charge will apply to merchandise that arrives back here in less than 30 days, and a 30% charge will be applied to items returned between 31-180 days. Those items over 180 days do not receive credit.

We are wholesale only!

This means we sell to other businesses such as Garden Centers, Nurseries, Landscapers and Pet Stores that are serious about water gardening. We don't sell to the retail public. Please do not send your customers here.

If you are not currently a customer and would like to order from this catalog, we will request the appropriate credentials on your first visit or order.

HARDY WATER LILIES

Our standard size waterlily is a well established tuber in a 9" x 6" pan except where noted. More mature plants with multiple crowns (clumps) are available for most varieties when a showier plant is desired. Clumps are well suited for a 16-23" container or similar planting pockets. Most varieties will handle depths of 15-24" and perform best in sunny locations. Exceptions to this are noted in the descriptions.

To achieve best performance hardy waterlilies should be fertilized every 4-6 weeks in season. We also recommend stocking Japanese Trapdoor Snails in your waterlily pools – they consume and digest algae and decaying plant material that otherwise would turn into "Goop" (a technical term meaningful only to those who have mucked out ponds). Those snails will result in a cleaner pool, healthier & cleaner plants and better sales – and they don't talk back, rarely call in sick, never ask for a raise, and probably move faster than some of the nursery labor we've hired over the years.

General hygiene is also important – minimal water circulation will help to insure adequate oxygen for all the good guys (beneficial bacteria and Japanese Trapdoor Snails). Please take note of our standard water quality practices which, as they have evolved over the past 20 years, have helped to assure good growth with a minimum of fuss & bother. If you've ever sniffed a bottle of that magic juice, you know we don't run around the nursery dumping it into pools for the fun of it!

Name	Hardiness	Description
ARC-EN-CIEL*	H1	Star-like pinkish white flower. Has unusual mottled foliage of green with pink and cream.
ATTRACTION*	H2	The vibrant, dark red blooms have a slight fragrance. This is a medium to large plant and will tolerate partial shade and/or depths to 3'.
BURGUNDY PRINCESS*	H1	Dark burgundy flowers with maroon new leaves. Flowers are small but prolific.
CHARLENE STRAWN	H2	Pale yellow blooms held above the surface, have a slight fragrance to them. It can form a sizable clump and tolerates partial shade .
CHARLIES CHOICE*	H1	Deep apricot - yellow flowers change to nearly red. Medium size plant adapts to some shade .
CHROMATELLA	H2	A Marliac variety, with large yellow blooms. Can be used in large or small pools. It has a long blooming season. Beautifully mottled leaves and tolerates some shade .
CHUBBY*	H1	Large bowl-shaped light pink blossoms and is fragrant too. It forms a heavy clump with prolific flowers.
COLONEL A. J. WELCH*	H1	Very vigorous mound of foliage with an occasional viviparous yellow flower. It is a good plant for medium to large pools and to provide cover for fish.
COLORADO*	H2	Extremely popular new Hybrid. Beautiful salmon-pink flowers held high above mottled leaves. It is a good plant for deep and larger pools .
DALLAS	H1	Starlike pink blossoms held above lightly mottled foliage. The flowers are very fragrant .
DENVER	H1	Large peony shaped, double, creamy white flowers. The leaves are slightly mottled with maroon.

HARDY WATER LILIES CONT

Name	Hardiness	Description
ESCARBOUCLE* aka Aframe	H2	Frequent crimson red to dark wine blooms that have a spicy fragrance . The Star-like blooms get up to 10" across. They like plenty of space - best for medium to larger pools.
FIRECREST*	H1	Pink blooms with narrow petals and red tipped stamens that have a sweet fragrance . It is a vigorous grower and is good for medium pools.
FLORIDA SUNSET*	H2	Large cup-shaped yellow flowers with a hint of pink. The blooms are held above mottled leaves. It is a strong bloomer and likes medium to large pools.
GEORGIA PEACH*	H1	Peach colored flowers held high above mottled foliage. It is a prolific flowering plant that likes medium pools - quite striking as a clump.
GLADSTONE	H1	Crisp white blooms with yellow stamens that measure 5.5-7" flowers. Green leaves are round and measure 11-12". Great for medium or large ponds!
GLORIE DU TEMPLE-SUR-LOT	H2	Awesome, but not frequent flowers. They are a double shell-pink that fades to white. This is a good plant for medium to large ponds.
GONNERE aka Snowball	H1	Large ball-shaped double white flowers with rich green lily pads. They make excellent cut flowers and are fragrant . It is free flowering and is good in any size pool.
HELVOLA aka Yellow Pygmy	H2	Miniature yellow flowers and is a very free flowering plant with mottled foliage. It will tolerate some shade and has a 12"-18" spread for the entire plant, which makes it suitable for a small tub garden. Grown in smaller 1 Gal container
HOLLANDIA* aka Darwin	H1	Large full petalled pink blooms that are slightly fragrant . It is a very vigorous grower & is floriferous - suitable for medium to large ponds
INNER LIGHT*	H2	Light yellow flower with a cream center. It is a good bloomer and is suitable for medium ponds.
JAMES BRYDON*	H1	Exquisite cup-shaped rose-red blooms that are fragrant . It will tolerate some shade . It is suitable for small to large pools and matures to a beautiful clump.
JOEY TOMOCIK*	H2	Large bright yellow flowers held high above the water. It stands out from all other yellows. It is a good grower and is good for deeper pools .
LEMON MIST	H1	Blooms fragrant soft yellow flowers that are 4-6". Leaves are a mottled green and have purple splotches. Recommended for small & medium sized ponds!
LITTLE SUE	H1	Free flowering! Blooms are star shaped orange with mauve streaking. That are 3-5". Pads are lightly mottled. Good for small or medium ponds.

Name	Hardiness	Description
MARLIAC WHITE	H2	Beautiful cupped shaped blooms that measure 5-6" with yellow stamens. Leaves spread 3-4'. Recommended for small or medium water gardens.
MARTHA*	H1	Large pink flowers with green foliage. It is an excellent grower and is good for any medium pool.
MASANIELLO*	H2	Peony-shaped fragrant flowers with rose-pink petals and white sepals. The flowers sit slightly above the water. It will tolerate some shade and water to 3' deep.
MAYLA*	H2	Beautiful large double fuchsia flower. It is a prolific flowering plant that works good for medium to large pools.
NIGEL*	H1	Dark pink double flowers that are also fragrant . They make good cut flowers. It is a free-flowering plant when established.
PATIO JOE	H1	Blooms are salmon pink held above mottled leaves. Free bloomer and a vigorous grower!
PAUL HARIOT	H2	Small changeable cup-shaped flowers that are orange. Blooms have a slight fragrance . Green slightly mottled leaves. Perfect for small ponds!
PEACE LILY	H2	Changeable - Resembles a Peace Rose. The flowers go from pink to white to yellow. They are suitable for medium ponds.
PERRY'S BABY RED*	H1	Deep red medium-sized flowers. It is a free-flowering plant that is great for tubs or small to medium pools.
PERRY'S DOUBLE WHITE	H1	Pure white blooms with slight ruffled green leaves. Has a long blooming season. Good for all sized ponds!
PETER SLOCUM*	H1	Moderately free-flowering with a medium pink flower that fades slightly. It has concave, peony shaped petals and gets 6-7.5 in. The blooms have a very sweet fragrance .
PINK BEAUTY aka FABIOLA*	H1	Rich pink petals with pale pink tips. It is a vigorous grower and is good for small to medium pools.
PINK GRAPEFRUIT*	H1	Large yellow-centered flower that gets 6-8" wide, with orange to pink outer petals. Large speckled leaves, the spread is between 4-6' - suitable for medium to large pools.
PINK OPAL*	H1	Round coral-pink blooms held up to 9" above the water. They are also fragrant . It is suitable for small to medium pools.
QUEEN OF WHITES*	H2	Cup-shaped blooms with broad white petals. They have a slight fragrance . It is a good plant for medium pools.
REFLECTED FLAME	H1	Small intensely red flowers held above green pads. The tips of the stamens are an intense yellow. Free flowering plant. Suitable for small to medium pools.

HARDY WATERLILIES CONT

Name	Hardiness	Description
SIoux	H2	Changeable - pale yellow to deep orange to coppery - red and has beautiful mottled leaves. It will bloom late into the fall and is suitable for small to medium pools.
SIRIUS	H2	Large deep red blooms that have a <i>slight fragrance</i> . The green foliage has deep red speckles. It is <i>tolerant of some shade</i> .
SPICE*	H2	Light yellow, <i>very fragrant flowers</i> with hints of peach on strong stems. It has slightly mottled foliage and is good for medium to large pools - a slow grower. <i>It was our first exclusive!</i>
STARBRIGHT	H2	Star-shaped creamy white blossoms. They are held above dark green foliage mottled with black. It is a good plant for medium ponds.
STEVEN STRAWN	H1	Bright cherry-red flower held above dark leaves with a slight speckle. It is a medium to large grower.
SUNNY PINK*	H1	Large apricot blooms held high above the water with speckled leaves. It is very impressive and is a profuse bloomer, and very durable.
SUNRISE	H2	Large yellow blooms which stay open late into the afternoon. They have a <i>slight fragrance</i> .
THOMAS O'BRIEN	H1	Blooms goblet shaped and are pink with a tinge of peach. Good for medium to large ponds.
TEXAS DAWN*	H1	Abundant large yellow blooms held well above the water. They are also <i>fragrant</i> . It will <i>tolerate partial shade</i> . It is our # 1 Seller - a must for any size pool.
VENUS*	H1	Free-flowering white blooms with a touch of pink. It has round bronze leaves that turn green. It is good for medium to large pools. Makes a very impressive plant.
WALTER PAGELS	H1	Blooms are creamy white with a <i>slight fragrance</i> . It will be good for small to medium pools and can form a significant clump.
WHITE STAR*	H1	White star-like flowers held above bronze leaves that turn green. Makes an impressive plant that is good for medium to large pools.
YELLOW QUEEN	H1	Free flowering with yellow <i>fragrant flowers</i> . Leaves are a mottled purple. Great for medium to large ponds.

Watch for some of our new varieties during the season!!

NOTE: Our practice and policy is to sell well-established Lilies that should bloom consistently. Provide adequate sunlight and fertilizer. Although Hardy Water Lilies can tolerate our cold winter conditions, they do not like drastic (water) temperature changes. Beware relocating plants into significantly colder pools in spring and small tubs that can heat and cool rapidly. At time of sale &/or relocation, transplanting into a larger (10-32qt) container is recommended (unless pool size dictates a "dwarf" plant).

TROPICAL WATERLILIES

Prolific flowering (and leaf growth) characterize the tropical water lilies from the early summer thru autumn, usually continuing well after the hardy varieties. The vivid and often fragrant flowers are held well above the water and the leaves generally have a serrated edge. They require 70 – 80 degree water temperatures to get started in May & June, but by autumn they're in high gear and just keep on flowering until ice forms.

Some might tolerate limited (4-6 hours of direct) sunlight but such pools might be too cool to get them up & running. They are heavy feeders and will respond with hundreds of blossoms over the season. It is possible (but difficult) to over-winter them indoors in our climate so most people treat them as an annual. Hundreds of flowers and four to six months of enjoyment make them a bargain!

Some other varieties may be available, as we try several new ones each year to select those that will perform best in our climate. An updated list will be available in May. We start these plants in heated water in our greenhouses and once established we take great pains to properly "harden them off" before shipping them to you. All are offered only in 9" x 6" pans but if you want some extra-large, showy giants consider repotting into the WLC167 or larger aquatic container.

Fertilize every 3-4 weeks during the summer to maximize growth and flowering.

NIGHT BLOOMING TROPICAL WATERLILIES

Waterlily	Description
Emily Grant Hutchinson	Cup shaped flowers are a dark rose pink and start forming earlier in the season than other night bloomers. Leaves are a bronze tinged green on the top and olive on the bottom
Mrs. George Hitchcock	Flowers are a light to medium pink with a darker center. Flower opens large and flat. Leaves are Bronze tinged and have a slight purple mottling on the newer ones.
Jennifer Rebecca	Fragrant, deep red flowers are held above large reddish brown leaves. Good choice for wintering in a greenhouse. Has a medium spread.
Red Flare	Striking deep red flowers which open flat and are held high above reddish-bronze leaves. It has a spread that is about medium - suitable for any pool.
Texas Shell Pink	Light pink flowers that are held above green foliage. It has a spread from medium to large and is our choice for most versatile night bloomer.
Trudy Slocum	Large white flowers surround golden stamens. It is a long lasting flower that is held above green foliage. It is a prolific bloomer and has a spread that is about medium.

Neither these or any other cultivated aquatica should ever be introduced into a natural body of water lest they disrupt the natural ecological balance

DAY BLOOMING TROPICAL WATERLILIES

Waterlily	Description
Albert Greenburg	Cup-shaped rose-yellow flowers with shades of pink, held above mottled foliage. It will adapt to different size pools. Continues blooming well into the fall.
Angela	Light blue flowers that are held above well mottled leaves. It is viviparous and forms a compact plant with a medium spread.
August Koch	Lavender-blue with rust colored stamens. The flower is fragrant and the dark green foliage has pink undersides. It is viviparous and has a modest spread, which makes it great for tubs.
Blue Capensis	Star-shaped blue flowers with yellow stamens. The flower is fragrant. It has beautiful speckled foliage. It lasts well as a cut flower. The plant spread is medium.
Colorata	Abundant deep blue flowers with green leaves. It has a small spread, which makes it great for tubs and smaller ponds.
Crystal	White flowers held above mottled leaves. It will be one of the last to still be flowering in November. It is a viviparous plant with a spread from medium to large.
Dauben	Small, light blue flowers with heart shaped leaves and brown splashes. It will tolerate shallow water and is viviparous. Makes a great plant for tubs, because its spread stays small.
Green Smoke	Fragrant flower with unique coloring. Center is light blue with a greenish yellow base with the central petals being tipped in blue. The outer petals are pale blue tipped in chartreuse. Green leaves with slight purple splotches look more bronze colored when they are new.
Islamorada	Unique pale purple flower with lighter freckles on the petals. It is vigorous and free-flowering. It is also viviparous and has a medium spread.
Madam Ganna Walska	Flowers are lavender with a touch of violet held above mottled foliage. It is a strong bloomer and is viviparous. Great for tubs, because its spread is small to medium.

Waterlily	Description
Mrs. Martin E Randig	Fragrant deep purple flowers with long tapering petals. It has foliage that is slightly blotched and red on the underside. Has a medium spread.
Midnight	Star shaped flowers are deep violet blue with gold centers. Stamen tops have become small petals thus creating a delicate fringe in the center. Dark green foliage with redish purple underside.
Panama Pacific	Deep purple flowers turn reddish as they mature. They are also fragrant. The plant is very viviparous. It is a good choice for wintering in a greenhouse. Has a spread from small to large.
Queen of Siam	Deep pink blooms that are held above highly mottled foliage, which turns red in autumn. It is a viviparous plant that has a spread from small to medium (but dense and florific).
Ruby	Rosy red flowers with green foliage. It is free flowering and is also great for tubs with a spread from small to medium. It overwinters well in a greenhouse.
Shirley Bryne	Striking rich pink flowers with yellow stamens held above green foliage. It is a viviparous plant that has a medium spread. Our choice for a pink.
Star of Siam	Blooms are mid-blue with white stamens. That are held above highly mottled maroon and green leaves. It is extremely striking and has a spread from medium to large. Awesome!
Tina	Vibrant blue flowers with a hint of purple. It is a very prolific bloomer even late into fall. It is also viviparous and adaptable to various light levels. It is a versatile plant that is great for tubs. Has a spread from small to large.

Some other varieties will be available, as we try several new ones each year to select those that will perform best in our climate. An updated list will be available in May.

Tropical Water Lilies require minimum water temperatures of 70°F and at least three hours of sunlight.

Container size will affect the spread of the plant, but DO FERTILIZE every 3-4 WEEK

HIGHLAND RIM FERTILIZER

10-26-10

- Specially formulated tabs for blooming aquatic plants.
- 10-26-10 ratio of nutrients.
- Provides nourishment for the most spectacular blooms possible!
- Recommended for Water Lilies and Lotus.

- HR12 — 12 ct packet (48 per case)
- HR36 — 36 ct jar (12 per case)
- HR80 — 80 ct jar (12 per case)
- HR300 — 300 ct bucket (1 per case)
- HR1000 — 1000 ct box (1 per case)

HORTICULTURAL AND PONDICULTURAL FYI:

Frogbit tolerates the coldest (40-45 degrees) water temperatures and is least likely to be destroyed by the fish (all bets are off when you're talking about larger Koi!)

Hyacinths tolerate 55 degree water but prefer 60+. Any significant fish population will trim their roots if not shred them.

Lettuce needs 60-65 degree water minimum or it will quickly look like last month's salad. Aphids can be a problem but just hose them off and let the fish eat them. (Imaginary fish only eat imaginary aphids – please don't get confused).

All of the above will appreciate an occasional dose of micronutrients for best growth as they starve algae into oblivion by their rapid uptake of nitrogen and phosphorus and all should be removed from the pond in the autumn before they sink & decay.

LOTUS

Our standard plants are grown in either 13" diameter or 18 qt / 16" diameter aquatic containers, as determined by the needs of the plant. We also offer some two-year plants (in those same tubs) that will yield a much heavier plant but definitely require up-potting. For a magnificent specimen plant we do aim to have a limited number of larger 23" tubs (2-3 year old plant). Please inquire for availability.

We do start our lotuses under plastic to give them a strong start but then carefully harden them off before shipping in May and June.

Lotus require full sun to flower regularly and perform best in shallow (1-3") water during the growing season. Lotuses are heavy feeders and should be fertilized every 3-5 weeks from April thru the end of August. Over-winter them in deeper water without cutting back – stems cut below the waterline could cause them to drown at any time of the year – remove only the dead foliage that comes off easily in your hand.

<i>Lotus</i>	<i>Description</i>
BEN GIBSON	Pink blooms with red veins, medium sized plant. It is early blooming and compact.
CAROLINA QUEEN	Large single pink blossoms with a yellow throat. It is great for medium & large ponds.
CASPICUM (Red Russian Lotus)	Very impressive red single flower. It is a large plant, so we recommend that you use a large planter - best for medium to large ponds.
CHARLES THOMAS	Pink blooms with a hint of lavender turning all lavender as flower matures. A unique color and "dwarf" habit - it is ideal for tubs and small pools.
CHAWAN BASU (Teacup Lotus)	White blossoms edged with light pink. It is a vigorous and free flowering plant. It's compact habit makes an excellent addition to tubs & small pools.
CHINESE BOWL LOTUS	Assorted "dwarf" varieties of lotus in BP107 pots - suitable for smaller tubs.
CHINESE DOUBLE ROSE	Double pink/red blooms on a small lotus that grows to about 2 ft. Dwarf variety suitable for small and medium ponds.
EMPRESS	Single white flowers with a rosy pink edge. It is also fragrant. The plant is a large, strong grower most suitable for medium to large pools.
FIRST LADY	Single 6-8" flowers that are lavender-red or pink. Medium sized plant that gets to be about 4' tall. Suitable for any size pond
HINDU	Blossoms have light pink petals with a yellow center. The flowers and leaves are very large. It becomes a large plant if given enough room and nutrients.
LAVENDER LADY	Single lavender pointed flower with a touch of blue. It is good for small to medium pools.

<i>Lotus</i>	<i>Description</i>
MOMO BOTAN	The double blooms are rosy-red and the leaf size is from 12-18" in dia. It is ideal for tubs and small pools - very vigorous.
MRS. PERRY D. SLOCUM	Changeable - Large double deep pink to creamy yellow blooms. It is also a vigorous grower.
PERRY'S GIANT SUNBURST	Large yellow-cream flowers on a large plant. It is an outstanding choice to brighten up any medium to large pond.
RED SCARF	Red flowers are 4" to 6" with white centers, on small plants that grow to about 2'. This smaller variety is a good choice for smaller ponds or tubs.
ROSEUM PLENUM	Very large double rosy-pink blooms. It is an excellent addition to any medium to large pool.
(Pekinensis) RUBRA (Red Chinese Lotus)	Large single cerise red which can grow to 6'. It is very impressive.
SHIROKUNSHI	Large tulip-shaped white blooms held high above leaves. The petals curve toward the center. Its blooms are also fragrant. It is suitable for tubs or small pools.
SHIROMAN	Large double white blooms that can reach 12" diameter. The flower lasts as a cut flower when the stem is cauterized. It's a large and vigorous plant.

LILY-LIKE PLANTS

APONOGETUM DISTACHYUS	Water Hawthorne Hardy in Zone 6	8" pan 3-4ppp
		Dark green strap-like leaves up to 10" float on surface. Very fragrant white flowers in spring and fall - the crocus of the water. A native of Madagascar that likes cold water - goes fully dormant June & July. Depth 6-12"
HYDROCLEYS NYMPHOIDES	Water Poppy Tropical	6" pan 3ppp
		Floating shiny green leaves 2" dia. Yellow flowers 2" dia. Sometimes hardy. Depth 6-10"
LUDWEGIA SEDIODES	Mosaic Plant Tropical	1 Gal
		Red & Green diamond-shaped leaves float on the surface making a mosaic, star-like pattern. Requires 70 degrees plus water temperature. Depth 4-12"
NYMPHOIDES CRISTATUM	White Snowflake Tropical	Qt
		Green leaves 2" dia. float on surface. White snowflake flowers 3/4" dia. Depth 6-10"
NYMPHOIDES GEMINATA	Yellow Fringe Tropical	Qt
		Brown leaves with green veins. Yellow feathery star-like flowers. Depth 6-10"

HARDY MARGINALS/ BOG PLANTS

The correct botanical term is “emergent aquatic species” but we only say that when we’re “showing off”.

Our “standard size” is an established plant that should not need to be repotted in typical smaller ponds. While it would be nice to simplify our production and use just one pot size – we’ve chosen over the years to use those pots (larger or smaller, deeper or shallow) that best suit the growth and stability of the plant. (We have filed a petition with Mother Nature to better standardize plant needs to accommodate a one-size-fits-all production plan but she hasn’t responded.) Various pot sizes are noted in the catalog with standard nursery trade nomenclature – most have drainage holes, except where necessary to confine the plant (such as Lotus & Lizzard Tail, both marathon runners!).

We do have some extra-large 3, 5 & 7 gallon Specimen aquatic plants and some Bare Root availability. Specimens are well suited for those larger ponds, “instant gratification” clients and general display so other customers can be properly inspired. If these would suit your needs better we’d love to sell them to you so please inquire for seasonal availability.

All Marginals have informative labels. They are propagated right here, from plants that have survived our New England weather to ensure hardiness. We always strive to produce healthy plants while avoiding anything that might be harmful to fish, frogs and other pond inhabitants, to the best of our knowledge. We hope that you will share our sensitivity to the aquatic ecology.

Name Common Name	Description	Size
Acorus calamus 'Variegata' Variegated Sweetflag	Green and white iris-like leaves 2.5' tall. It is scented and grows in depths from -0-5"	1.5 Gal
Acorus graminus 'Ogon' Golden Japanese Sweetflag	Bright yellow stripes on light green leaves. It does well in sun or shade. The plant has a dwarf evergreen form. Grows well in depths from -0-2".	1 Gal
Acorus graminus 'Variegata' Variegated Jap. Rush	Green and white grass-like clumps 10" tall. It is also scented and grows well in depths from -0-4".	1 Gal
Arundo Donax 'Variegata' Variegated Reed	Variegated stiff upright reed to 6' or more. It has a Bamboo-like appearance. Will grow well in depths from +6" to -6".	2 Gal
Baumea rubiginosa 'Variegata' Variegated Rush	Stiffly upright to 2', vertical yellow stripe on each leaf. It tolerates some shade and grows well in depths from 1-6".	1 Gal
Calla palustris Bog Arum	Dark green cordate leaves 8-12" long. It has an Arum - like flowers in spring and spikes of red berries in fall. It will grow well in depths from -0-4".	1 Gal
Carex psuedocyperus Gray Sedge	Vigorous, gray-green grass-like foliage to 15". It has a Burr - like seed head. Will grow well in depths from 0-6".	1 Gal
Dulichium arundinaceum Dwarf Bamboo	Midgreen leaf blades 1/2" long on 1.5' stems. It is not overly invasive and grows well in depths from 0-4".	1 Gal
Dulichium arundinaceum 'Tigress' Variegated Bamboo	Delicate streaks along the leaf margin and white stripes on the nodes of the stem.	1 Gal
Eleocharis Montevidensis Spike Rush	Bright green, grass-like reed. It is a full clumping plant that grows well in depths from 0-2".	1 Gal
Equisetum hyemale Horsetail Reed	Hollow rush-like plant with green stems that have black bands at joints. It will grow 3' tall and does well in depths from 0-6".	1 Gal
Equisetum scirpoides Dwarf Horsetail Reed	Clumped dark green jointed stems that get to 3-4" tall, like a grassy carpet. It will grow well in depths from 0+.	1 Gal

Name Common Name	Description	Size
Eriophorum angustifolia Cotton Grass	Tufted plant with grass-like leaves which support slender stems of cotton-like flowers in spring. It will grow to 12-15" tall and does well in depths from 0-2".	1 Gal
Glyceria Maxima 'Variegata' Sweet Manna Grass	Grassy foliage green & white striped with a tinge of pink in Spring. It is a very vigorous grower. It will grow to 24" tall and does well in depths from +4 to -4".**State restrictions might apply	1 Gal
Hemerocallis fulva NativeTawny Daylily	Arching green foliage with orange flowers born on tall spikes. It is a vigorous grower that stands abuse. It will grow well in depths from +4 to -4".	1 Gal
Houttuynia cordata Green Houttuynia	Heart-shaped bluish-green leaves with reddish stems. It has cute small creamy white flowers. It is a vigorous grower that does well in depths from 0-4".	1 Gal
Houttuynia cordata 'Variegata' Chameleon Plant	Heart-shaped leaves that range in color: blue, red, cream, green. The stems are reddish but flowers rarely. It will grow well in depths from 0-4".	1 Gal
Hibiscus moschuetos Swamp Hibiscus	Small woody shrub flowers in July and August with large pink, white or red flowers. Can tolerate some shade and is adaptable to slightly brackish waters.	1 Gal
Hydrocotyle verticillata Water Pennywort	Round leaves that are slightly scalloped and are 1-2" dia. It is a fast growing plant that does well in depths from 0-2". An aquatic "groundcover".	1 Gal
Juncus effuse Common Rush	Stiff green, pith-filled, round stems will reach 2' with insignificant flowers. It will grow well in depths from 0-6".	1 Gal
Juncus effusa glauca Blue Rush	Stiff blue, pith-filled, round stems will reach 2' with insignificant flowers. It will grow well in depths from 0-6".	1 Gal
Juncus effusa 'Gold Strike' Gold Strike Rush	Vertical yellow stripes on narrow green spikes. It is suitable for colder climates. It will grow well in depths from 0-6".	1 Gal
Juncus effusa 'Spiralis' Corkscrew Rush	Green pith-filled, round twisted (corkscrew) stems can reach up to 1.5'. It has insignificant flowers and can grow in depths from 0+.	1 Gal
Juncus inflexus 'Afro' Blue Corkscrew Rush	Blue pith-filled, round twisted stems can reach up to 1.5'. It holds the corkscrew shape well and will grow in depths from 0-3".	1 Gal
Lobelia cardinalis Cardinal Flower	Red tubular flowers cluster on stalks 2-4' tall. It has alternate lanceolate leaves and tolerates some shade. Will grow well in depths from +3 to -1".	1 Gal
Lysimachia nummatalia Moneywort.	Green whorled leaves with bright yellow flowers. It's useful for coping, "Ground" cover or fully submerged as an oxygenator/ OK for shade/ Depth 0-6". **State restrictions might apply	6" pan
Lysimachia num 'Aurea' Golden Moneywort	Slower growing Moneywort with clear yellow foliage - all the benefits of Moneywort but does not flower as freely so is less likely to spread to other parts of the garden. **State restrictions might apply	6" pan
Marsilea mutica Water Clover	Leaves are green with mottled yellow and brown. The four-leaf clovers float on the surface of the water. Elevate top of the pot to confine. It will grow well in depths from 3-12".	1 Gal

HARDY MARGINALS/ BOG PLANTS CONT

Name Common Name	Description	Size
Mentha aquatica Water Mint	Fragrant green leaves with lilac flowers in late summer. It can be invasive. It will grow well in depths from 0-6" - great for vegetative filtration.	1 Gal
Mentha aquatic var. crispa Curly Mint	Textured, ruffled leaves with small pink flowers in late summer. Not as fragrant as Water Mint but more intricate texture.	1 Gal
Meyanthes trifoliata Bogbean	Three-leafed foliage with a light pink star-shaped, fringed flower. It will grow well in depths from 1-6". Cut back annually to fill in.	1 Gal
Mimulus ringens Lavender Monkey Flower	Soft green foliage that clasps square stems about 2 1/2' tall. Paired snapdragon like flowers. In a range of lavender shades from June thru Sept.	1 Gal
Myosotis palustris Water-Forget-Me -Not	Thick mat of small green leaves and tiny blue flowers. It will cover pool edge & water surface. It is also OK for shade and grows well in depths from 0-4". **State restrictions might apply	6" pan
Oenanthe javanica (Invasive) Water Celery	Celery-like plant that gets 1-2' tall. It is an aggressive natural filtration plant and will grow well in depths from 0-6".	1 Gal
Oenanthe jav. 'Variegata' (Invasive) Variegated Water Celery	Celery-like plant with variegated leaves with pink edge. Excellent, aggressive natural filtration plant. It will grow well in depths from 0-6".	1 Gal
Orontium aquaticum Golden Club	Unusual white pencil-like flowers with yellow tips. It has elongated leaves that are dark green. It will grow well in depths from 0-10".	1 Gal
Peltandra virginica Arrow Arum	Dark green arrow-shaped leaves. It is Native to North America. The blooms are pale green and arum-like and will have lime green berries after it flowers. It will grow well in depths from 0-6" and form a neat clump.	1 Gal
Phalaris arund. Feecy's Tricolor Ribbon Grass	This spreading grass with light green and white leaves will get 2' tall. It has pink highlights and is OK for shade. It will do well in depths from 0-6". **State restrictions might apply	2 Gal
Phalaris arund. Picta Variegated Ribbon Grass	This aggressive grass with light green and white leaves will get 2' tall. It is very colorful and is OK for shade. It will do well in depths from 0-6". **State restrictions might apply	2 Gal
Pontaderia cordata Purple Pickerel Rush	Glossy deep-green heart-shaped leaves on 2' stems. It has 6" spikes of blue flowers and will grow well in depths from 0-10" - Native.	8" Pan
Pontaderia cordata alba White Pickerel Rush	Glossy deep-green heart-shaped leaves on 2' stems with 6" spikes of white flowers. It will grow well in depths from 0-10" - selected and propagated vegetatively for best color.	8" pan
Pontaderia cordata 'Pink Pons' Pink Pickerel Rush	Glossy lighter green leaves than above. They grow to about 2' with lavender-pink flowers held above the foliage.	8" pan
Ranunculus flammula Lesser Spearwort	Masses of buttercup yellow flowers, but unlike buttercups, the leaves are undivided and spear-shaped. The red tinged stems can root at the leaf junctions. Will bloom all summer if deadheaded.	1 Gal
Sagittaria latifolia Arrowhead	A native with light green arrowhead-shaped leaves. The flowers are white with 3 petals. It will do well in depths from 0-6" and reseeds aggressively.	1 Gal

Name Common Name	Description	Size
Saururus cernuus Lizards Tail	Pendulous spikes of white flowers to 6" long. The heart shaped leaves turn color in fall. It has reddish stems and is quite colorful. It will do well in depths from 0-6".	BP85
Saururus cernuus 'Albiform' White Lizard's Tail	Denser and more compact. The light green stems and petioles contrast sharply with above. We introduced this selection. It will do well in depths from 0-6".	BP85
Scirpus Albescens Striped Bullrush	Tall rush-like stems vertically striped white & pale green. It will grow to 4'. The tops have brown flower tufts in summer and it will do well in depths from 2-6".	1.5 Gal
Scirpus Zebrinas Zebra Rush	Tall rush-like stems that are banded green and white. It will grow to 42". The tops have brown flower tufts in summer. It will do well in depths from 2-5".	1.5 Gal
Thalia dealbata Hardy Thalia	Leaves are bluish, Canna-like and dusted with white powder. The panicles of violet flowers are held higher than leaves. It is an excellent architectural specimen. It will grow well in depths from 1-5" but sprouts late so be patient.	2.5 Gal
Typha angustifolia Narrow-Leaf Cattail	Gray-green leaves are 1/2" wide and can reach 6' tall. The male flower is separated from the female by 1" of stem. It will grow well in depths from 0-6".	2 Gal
Typha latifolia Common Cattail	Gray-green flat leaves are 1" wide and can reach 8' tall. It is very aggressive and will do well in depths from 0-6". Native.	3 Gal
Typha latifolia 'Variegata' Variegated Cattail	With beautiful green & white variegated leaves it is less vigorous than common cattail. They will reach 4' tall and will grow well in depths from 0 - 6".	2 Gal
Typha laxmannii Graceful Cattail	Very slender dark-green leaves reaching 3'. It will grow well in depths from 0-6". Great for the small to medium pool.	1.5 Gal
Typha minima Dwarf Cattail	This Dwarf species has reed-like leaves that are blue-green and reach only 18". The Catkin is short and round. It will do well in depths from 0-4".	1 Gal

HARDY MARGINALS/ WATER IRIS

The Iris (and most other marginal plants) serve to frame the water surface and to add a third (vertical) dimension to the pond picture. Most Iris blossom over a 2-3 week period with the earlier varieties starting to blossom in early May here at the farm and the latest ('Rose Queen' and our own 'Freckles') blossoming in July. We offer plenty of choices (and you thought that was just to confuse you) to equip you to provide a steady succession of bloom for 10-12 weeks.

Most grow to roughly 2' tall, Depth (measured from top of pot or soil surface to water surface) desired is 0-6" except as noted. Propagated vegetatively and painstakingly and grown on our farm to ensure hardiness and variety. Some additional specialty Iris may be available in season.

Name Common Name	Description	Size
Iris ensata (kaempferi) Japanese Iris	Multiple blue to purple flowers (late) on a nicely formed clump. It will grow well in depths from 0+. It tolerates some shade.	1.5 Gal
Iris ensata (kaempferi) - Fancy Hybrids Japanese Iris	Multiple blue, pink, white, & veined flowers on a nicely formed clump. It will tolerate some shade and grows well in depths from 0+.	1.5 Gal

HARDY MARGINALS/ WATER IRIS CONT

Name Common Name	Description	Size
Iris ensata Variegata (kaempferi) <i>Variegated Japanese Iris</i>	Blue flowers/ Some shade is ok. Striking all summer with its variegated foliage. Depth-0+.	1.5 Gal
Iris laevigata <i>Blue Water Iris</i>	This plant has beautiful blue flowers in early spring. Do not allow this plant to dry out. (depth 0-6").	1 Gal
Iris laevigata Alba <i>White Water Iris</i>	This Iris has white flowers (early) but is not as vigorous as the blue. Do not allow this plant to dry out.	1 Gal
Iris laevigata Variegata <i>Variegated Water Iris</i>	This is a striking Iris. It has blue flowers that stand up against bright variegated green and cream leaves. Our top choice all season but slow growing.	1 Gal
Iris pseudacorus <i>Yellow Flag Iris</i>	Sword-like leaves are 1" wide and 3' tall. It has large clusters of yellow flowers 3" across (early) and does reseed vigorously. **State restrictions might apply	1 Gal
Iris Pseud. 'Bastardi' <i>White Flag Iris</i>	Free-flowering plant with pale cream flowers. It grows well in marshy ground or shallow water (+6 to -6").**State restrictions might apply	1 Gal
Iris Pseud. 'Flore Plena' <i>Double Yellow Iris</i>	Variety of iris pseud. which has large double flowers. It grows well in depths from 0-4".**State restrictions might apply	1 Gal
Iris versicolor <i>Blue Flag Iris</i>	Flowers are violet - blue, (very early) with patches of yellow at base. It will grow well in depths from 0-4", quickly developing a great clump. Native.	1 Gal
Iris x. Black Gamecock <i>Black Gamecock</i>	Very different looking dark bluish-black flowers (mid-season). The plant will get to about 15 - 24" tall and quickly forms a good-sized clump. Native.	1 Gal
Iris x. Chance beauty <i>Chance Beauty</i>	Vigorous grower with yellow flowers, distinctive brown outline to center of flower.	1 Gal
Iris x. Clyde Redmond <i>Clyde Redmond</i>	Narrow foliage with rich blue flowers (mid-season). It will reach about 2 - 3' tall, is slow growing but worth the wait.	1 Gal
Iris x. Delta Dawn <i>Delta Dawn</i>	Striking lavender flowers with apricot-pink centers (mid-season) make this a popular choice.	1 Gal
Iris x. E.L. Francis <i>E.L. Francis</i>	**Our introduction. This is an Iris versicolor cross with the darker colored blooms that start about 2 weeks later.	1 Gal
Iris x. Freckles <i>Freckles</i>	**Our introduction. A very unique, beautiful purple flower with white freckles. It is very late blooming	1 Gal
Iris x. Handmaiden <i>Handmaiden</i>	Beautiful pink flowers (mid-season) make this the standard for "pink". Its modest growth rate allows for companions.	1 Gal
Iris x. King Creole <i>King Creole</i>	Bluish-purple flowers, with a deep yellow center make this a great counterpart for Handmaiden.	1 Gal
Iris x. Mighty Rich <i>Mighty Rich</i>	Rich ruby-red flowers with yellow centers (mid-season) make this slow grower well worth the wait.	1 Gal

Name Common Name	Description	Size
Iris x. Queen of Violets <i>Queen of Violets</i>	Double purple flowers that bloom early spring and occasionally in the Autumn also.	1 Gal
Iris x. Rose Queen <i>Pink Flag Iris</i>	Unique clear pink flowers adorn tight clumps of narrow foliage (to 2'). It is a late flowering plant - same time as Freckles.	1 Gal
Iris x. Roy Davidson <i>Roy Davidson</i>	This floriferous yellow flower with deep brown veins does look similar to Iris pseudacorus without the reseeding threat.	1 Gal

TROPICAL MARGINALS

These are used primarily for vertical and textural accent but also can contribute shade and shelter for various aquatic creatures and will take up lots of nutrients from the pond water. They can be used to create that lush tropical feel to the pond and surrounds –add your own Hula dancers.

They are frequently discarded as “Annuals” but most can be brought indoors for the winter and will generally do fairly well in a sunny window – use an aquatic containers shown on page 17 to provide a suitable environment and act as a humidifier too!

Name Common Name	Description	Size
Bacopa caroliniana <i>Lemon Bacopa (Water Hyssop)</i>	Lemon scented green foliage that can grow fully submerged although it will not flower as well. Small blue flowers that last all summer. Tolerates some shade. Best depth 2" - 6"	1 gal
Colocasia antiquorum <i>Imperial Taro</i>	Large (20") heart-shaped leaves on long (2 - 3') green stems. The leaves are emerald green with blotches of dark brown and violet.	2 Gal
Colocasia esc. font. <i>Purple-Stem Taro</i>	Large green heart-shaped leaves on long (3 - 4') dark purple stems. It is a vigorous grower .	2 Gal
Colocasia rubra <i>Cranberry Taro</i>	Large maroon heart-shaped leaves on 3 - 4' maroon stems. Our most popular Taro.	2 Gal
Cyperus alternifolia <i>Umbrella Palm</i>	Ribbed stalks that get 24-48". The crown of bright green spikelets surrounds small green “flowers” - perfect for the medium pond.	1.5 Gal
Cyperus Alternifolia Nana <i>Dwarf Umbrella</i>	Very slender, wiry stems and narrow leaves. They only get 18" tall. Will grow well in depths from 0-6".	1 Gal
Cyperus haspans <i>Dwarf Papyrus</i>	Green tufted foliage on top of slender triangular stalks of 18-30". It somewhat resembles Dill - great for the small to medium pool.	1 Gal
Cyperus papyrus <i>Giant Egyptian Papyrus</i>	Dark green triangular stems 3-6' high with pendulous heads of thread-like leaves. An awesome specimen for the medium to large pond.	3 Gal
Cyperus papyrus 'Tutankhamun' <i>Little Giant Papyrus (King Tut Papyrus)</i>	Dark green triangular stems 2-4' high with full heads of thread-like leaves. Shorter and compact form of papyrus.	2.5 Gal
Dichromena colorata <i>Star Grass</i>	Green sedge grows 12-18" tall with white star-shaped flowers at the tips. It blossoms continuously thru the summer.	1 Gal

TROPICAL MARGINALS CONT

Name Common Name	Description	Size
Echinodorous x. Marble Queen <i>Marble Queen</i>	This plant resembles a colorful Sagittaria. The flowers are pure white with brightly variegated foliage. It grows well in depths from 0-2" and tolerates shade.	1 Gal
Eleocharis tuberosa <i>Chinese Water Chestnut</i>	Clumps of green spike-like stems 1-3' tall. It will have autumn colors as it enters winter dormancy.	1 Gal
Gymnocoronis spil. 'Variegata' <i>Variegated Water Snowball</i>	Irregular white margins on the elongated leaves that make up this bushy plant. Clusters of white ½" ball shaped white flowers that attract butterflies . Tolerates some shade.	1 Gal
Ruellia brittoniana "Chi Chi" <i>Mexican Petunia</i>	Dark purplish green lance shaped foliage with trumpet shaped pink flowers. Foliage gets to about 2' tall, prefers full sun but can tolerate bright shade.	1 Gal
Thalia geniculata rubraform <i>Red Stem Thalia</i>	Broad lanceolate green leaves are supported on red stems. The blue & purple flower spikes can reach 10' - very impressive mid-late summer.	2.5 Gal
Tulbaghia violacea 'Variegata' <i>Variegated Society Garlic</i>	Garlic-like plant with white and green stripes it has violet flowers from late spring to fall. It will grow well in sun or shade. The leaves and flowers are edible with a pungent garlic flavor.	1 Gal
Zephyranthes candida <i>Rainlily</i>	Dark Green grass like foliage in clumps. Flowers mid to late summer with many prominent small white star shaped flowers with golden stamens late summer.	1 Gal

FLOATING PLANTS

Cheaper (Southern) Hyacinths and Lettuce can be had, BUT THERE IS A DIFFERENCE! Ours have been grown & selected for their tolerance to cooler water, lower light levels, and their flowering habit. As weather permits we carefully "harden" them off (ie. yes, they come out of a greenhouse but we shock the daylight out of them and bring the survivors back to health by late April or May) for best performance and customer satisfaction. To put it simply, we do a great job with our plants! And we don't blame the other guy for selling his plants for less – he knows what they're worth!

Aeschynomene fluittans Giant Sensitive Plant (annual)	Large brick red hairy stems and yellow pea-shaped flowers. Leaves close slowly when touched.
Eichornia crassipes Water Hyacinth (annual)	Shiny green leaves. Lavender blue flowers. Fast grower. Fish may eat the feathery roots. The #1 "tool" to maintain water quality and clarity.
Limnobium spongia American Frogbit (annual)	Fleshy heart shaped leaves 1-2" across. Leaves are arranged in a 2-5" rosette with an insignificant bloom.
Neptunia oleraceae Sensitive Plant (annual)	Pinnately compound leaves close when touched and at nighttime. Tiny round yellow flowers in the summer. Runners have white sponge-like "floats". Requires water temperature 70 degrees plus.
Pistia stratioides Water Lettuce (annual)	Rosettes of light green, soft, velvety leaves with feather-like roots. A fast grower in hot weather. Watch out for aphids and pond snails.

AQUATIC CANNA HYBRIDS (TROPICALS)

Canna Hybrids usually take up where the Iris leave off – great for vertical definition and blossoms all summer long. We list them among the tropical marginals although they are technically a zone 8 perennial. (Compared to winters in central Massachusetts, zone 8 is tropical!!!) Since we start them in the greenhouse they are prone to late spring freeze damage but warmer pond water will protect them against that late May frost. They do require 55 degree (or higher) water temperature for active growth and will bud and bloom most years until October!

The varieties that we offer are truly aquatic and want to be continually wet if not immersed. They will be happy 3-6" under the surface or 3-6" above, with their feet in the water, so we grow them in a standard nursery container (with "drainage" holes to assure they can get to the water). They can be overwintered in a bright window by placing them in an aquatic pot full of water – they're not smart enough to notice the difference between a 2 gallon "pool" and a 2000 gallon pond!

We think the best canna is Hallucination (we're only slightly prejudiced since it was our first original hybrid) for its floriferous habit and more modest height – it runs about 60% of the height of Ra, Erebus, etc.

Name	Description	Size
African Sunset	Has orange flowers that stand above variegated red to yellow foliage.	1.5Gal
Bali Temple of Flame	Green leaved canna that grows 2-3'. Has a very cute red flower.	1.5G
Bengal Tiger	Orange flowers with large green and yellow variegated leaves - improved form.	1.5Gal
Endeavor	Red flowers with glaucous green leaves - a Longwood hybrid.	1.5Gal
Empress	Yellow flowers with slightly variegated leaves.	1.5Gal
Erebus	Pink flowers with glaucous green leaves - a Longwood hybrid.	1.5Gal
Hallucination	Pastel pink flower with yellow throat, shorter than other varieties. **Our introduction	1.5Gal
Pink Sunburst	Bright pink flower, variegated red to yellow foliage.	1.5Gal
Ra	Yellow flowers with glaucous green foliage - a Longwood hybrid.	1.5Gal
Red Dwarf	Red flowers with burgundy foliage.	1.5Gal
Tanny	Orange flowers with glaucous green leaves - a Longwood hybrid.	1.5Gal

SUBMERGED AQUATIC PLANTS

- one clump recommended for every 1-2 sq. ft. of surface, to help to oxygenate and to reduce nitrate and phosphorous levels. We Americans prefer our gadgets, but plants, including these unlovely submerged types are a key part of Mother Nature's water quality program. Gadgets or plants – take your pick. Please don't smoke the Hornwort!

Use of lead weights in ponds is frowned upon and may soon become illegal. Ours probably don't have them but if you find some:

- Lead weights should be removed before "planting".
- For planting use mesh type baskets and stone (3/8" is ideal) rather than soil.
- Locate baskets where little or no surface cover will impede growth.
- They do their best work in the sunlight.

Ceratophyllum demersum <i>Hornwort</i>	Plant is similar to but broader than foxtail and seems to be very effective in controlling ammonia and nitrites.	BR
Hippuris vulgaris <i>Hippuris</i>	Native North American alternative to Parrots Feather, (no quantity discount)	1 Gal

FISH Top quality, Healthy Koi and Goldfish for your garden Pool.

Please note that "goldfish" are a much more "forgiving" fish than are Koi. While Koi have tremendous appeal, we strongly recommend that novices begin with some goldfish until they have developed the skill of monitoring and maintaining the water quality at 100%. You should never release fish into a natural body of water lest they disrupt the natural ecological balance. Don't mess with Mother Nature!!!

We endeavor to bring in only the healthiest fish. They generally remain in our pools 7-10 days for an "acclimatization" period to ensure their health and vigor. We rely on good water quality without high levels of salt to ease them past their stressful in-bound transport. We routinely

treat all of our fish systems with prophylactic parasite, fungus and bacteria controls to prevent problems from "popping up". Our pro-active approach to fish health and to getting them to you without further stress gives you assurance of trouble free "livestock".

We will endeavor to have a large variety thru the season.

All fish orders are subject to **availability at time of shipping**.

Please inquire for potential availability.

Prices are subject to fluctuations in season. Price on availability cancels all previous pricing.

Comet -	Shubunkins -	Sarasa -	Koi -	Butterfly Koi -
Similar to the Common Goldfish, the Comet often displays the same coloration. Comets are longer and thinner than the Common Goldfish, and its caudal (tail) fin is much longer. Its shape allows it great speed which it can sustain for brief periods (not much defense against a Blue Heron, but it does make catching them quite a challenge).	Shubunkins are long bodied and best known for their mottled coloration in shades of yellow, orange, blue and black. The Shubunkin is a hardy fish, and like Comets, they are a good "starter" fish – easier to get along with and less expensive than are Koi.	The Sarasa Comet is a type of single-tailed goldfish. The Sarasa Comet differs from the wild Carp in that it lacks the barbells on the mouth area, the markings at the base of the scales, and the size. The Sarasa Comet is a hardy fish, and is a brilliant red with white patches (or white with red patches)	(Nishikigoi to be proper in Japanese) are beautiful colorful fish which have been derived from the common carp – but don't tell them or you'll hurt their pedigreed feelings. The Japanese have been working with these fish for over 200 years and it is to them we owe thanks for so many different colors and patterns. They grow 2-4 inches per year in the average pond and will reach 36" in length. Koi can be addictive or at least habit forming!	Are Koi whose fins are more than double the normal fin size of an average Koi. They are an extremely graceful and beautiful seen swimming through your pond. The Japanese name for these fish is "Water Dragons".
FC34 Comet 3-4" FC45 Comet 4-5" FC56 Comet 5-6" FC68 Comet 6-8" FC810 Comet 8-10"	FS34 Shubunkin 3-4" FS45 Shubunkin 4-5" FS56 Shubunkin 5-6" FS68 Shubunkin 6-8" FS810 Shubunkin 8-10"	FSC34 Sarasa Comet 3-4" FSC45 Sarasa Comet 4-5" FSC56 Sarasa Comet 5-6" FSC68 Sarasa Comet 6-8" FSC810 Sarasa Comet 8-10"	FK45 Koi 4-5" FK56 Koi 5-6" FK68 Koi 6-8" FK810 Koi 8-10" FK1012 Koi 10-12" FK1214 Koi 12-14"	FBK56 Butterfly Koi 5-6" FBK6-8 Butterfly Koi 6-8" FBK810 Butterfly Koi 8-10" FBK1012 Butterfly Koi 10-12" FBK1214 Butterfly Koi 12-14"

****Standard Pricing is for "Run of the pool". Selected fish will be 50% above cost.****

- Fish will be shipped, properly packed via our own truck.
- Normal Delivery terms apply/ For every box of fish please add 1 **FPC** Fish packaging charge.
- FPC does not cover the cost of the insulated box and ice packs- Please return.
- Bags for resale included with each order.

To minimize water quality problems, we suggest stocking no more than 1" of fish per cubic foot of water until filter "matures".
(i.e. 53 cubic feet = 8 -10 fish 4-5" in size).

SCAVENGERS

"Living filters" Consume algae, leftover fish food and decaying plant material - will not harm the desirable plants. Minimum order is 25

Japanese Trapdoor Snails (Vivaporous Malleatus)

Single rate 100 Rate

Standard size JTS JTS100
Breeder Sized JTSM JTSM100

These trapdoor snails are "hardy", i.e. Able to survive our winters under the same conditions as are the goldfish and Koi. They are live-bearers hence unlikely to overpopulate any pond and they don't eat our waterlilies! They act like slow moving vacuum cleaners as they consume algae, decaying organic matter and leftover fish food. No pond should be without them and the recommended stocking rate is one snail for every 1-2 square feet. When Mother Nature comes up with a household version, I'll be the first one in line!

Bullfrog Tadpoles Single rate 100 Rate
(Rana Catesbiana) BTS BT100

Any pond will quickly become home for various toads, green frogs, tree frogs, leopard frogs, dragonflies' etc.. Bullfrogs are territorial so not often out "home hunting". Their tadpoles are fascinating for young and old as they develop into frogs and in the meantime they help to keep the pond clean. As adults, they'll eat a princely amount of mosquitoes and gnats to keep the yard insect free and doubly enjoyable. **FIGHT EEE AND WEST NILE VIRUS - INSTALL MORE WATER GARDENS!!!** You can sell the frogs too if you can catch them but tadpoles are much easier.

SPECIMENS

Specimen plants are available (or can be made available) for every plant we sell. Specimens provide instant maturity to any pond. They work as excellent sales tools when used to demonstrate what a 1 gal. plant will look like in a couple of months or couple of years. On our regular availability list are some of the specimens which are currently available. Some of the most popular specimens are the Cannas, Meyanthes, Peltandra, Lilies, Lotus, Taros and the Cyperus family plants. Feel free to talk with us about your specimen plant needs and we'll be glad to help you.

AQUATIC CONTAINERS

ACWBL/S — Whiskey Barrel Liner with Spillway

26 1/2" x 15"

ACWBL — Whiskey Barrel Liner

26 1/2" x 15"

AC45AQ — Holds 45 gallons

29 1/2" x 17 1/2"

AC50SAQ — Holds 50 gallons

36" x 12"

AC65SAQ — Holds 65 gallons

35" x 18" (not pictured)

AC200SAQ — Holds 200 gallons

58" x 18"

AC300SAQ — Holds 300 gallons

58" x 26" (not pictured)

ACTB27AQ — Holds 45 gallons

26 1/2" x 16 1/2"

ACRL45AQ — Non-Ribbed 45 gallons

29 1/2" x 17 1/2"

ACBUT50 — Bath Utility Tub

42" x 26" x 15" (not pictured)

ACKSB2310 — Koi Show Bowl

23" x 10" BLUE

ACKST100 — 100-gallon Utility Tank

47" x 19" BLUE

ACLUT100 — 100-gallon Utility Tank

47" x 19" BLACK (not pictured)

ACLC206 — Lotus Container

20" x 6"

ACB20SAQ — Lotus or Lily Planter 20.0g

23" x 13"

ACHC2310 — Lotus or Lily Planter 15.14g

23" x 10" (not pictured)

ACPDC/S4248 — Plant Display Container with Spillway

42" x 48" x 12" 105 gallons

ACPDC4248 — Plant Display Container

42" x 48" x 12" 105 gallons (not pictured)

ACPF300 — 1 gallon 6 5/8" x 6 1/2"

ACCT1000AQ — Injection Molded 1.93g

10" x 7 3/4"

ACBP85 — 8" x 5"

ACBFN106 — Ribbed Blow Molded

10" x 6"

AC5050AQ — 3-gallon Squat

10 7/8" x 7 5/8"

ACWLC — Water Lily Container

16" x 7"

ACR2212 — ROSEANNE Marginal Plant Container

22" x 12" x 7"

Heavy Duty Oval Tank

- Heavy duty, impact resistant: virtually unbreakable
- Heat and cold resistant: will not crack
- UV resistant: withstands years of outdoor exposure
- Paintable: add your own color finish
- Drain plug: larger 2 models come with bulkhead fitting and plug

TSP98 — drain plug

40" w x 58" l x 24" h 180 gallons

TSP99 — drain plug

38" w x 56" l x 20" h 140 gallons

TSP100 — no drain plug

34" w x 51" l x 20" h 110 gallons

TSP85 — no drain plug

34" w x 49" l x 18" h 85 gallons

Planting Baskets

- Baskets have a variety of uses from submerged aquatics to water lilies.
- Large ones can be used to pre-screen pumps.

ACB10 — Small Round Basket
5" dia x 4" high

ACB11 — Medium Round Basket
6 1/2" dia x 5 1/2" high

ACB20 — Small Square Basket
7 1/2" dia x 3 1/2" high

ACB30 — Medium Square Basket
9 1/2" dia x 5 1/2" high

ACB40 — Large Square Basket
11 1/2" dia x 7 1/2" high

ACB60 — XLarge Square Basket
15 1/2" dia x 11" high

ACB50 — Large Kidney Basket
19" long x 8" wide x 6" high

ACBH — Basket Handle (not pictured)

Kettle Tubs

ACKT24F — 24" Kettle Tub with Flat Bottom

ACKT24 — 24" Kettle Tub with 3 Legs

ACKT36 — 36" Kettle Tub with 3 Legs

Islandscapes

- Living floating gardens.
- Improves water quality naturally.
- Open weave matrix promotes growth all the way to the water line.
- New mini pocket design for more planting creativity.
- Innovative open matrix that makes them a highly efficient Phytofilters, a four-stage biological system that removes Phosphate, Ammonia, Nitrate, and Nitrite.
- Lush growing environment for terrestrial plants.
- Contains Tether Ring for Anchor, special soil blend and planting instructions.
- Maintenance Free.

Model #	Dimensions	Biological Benefit
FPIP050	19" x 28" New size for 2008	up to 750 gal. pond
FPIP100	31 1/4" x 22 1/2" x 5 1/2"	up to 1,000 gal. pond
FPIP200	40 1/4" x 31" x 5 1/2"	up to 2,500 gal. pond
FPIP300	56" x 37 1/4" x 7 1/4" Special Order Only	up to 5,000 gal. pond
FPIP400	56" x 47" x 7 1/4" Special Order Only	up to 10,000 gal. pond

HOSTAS

Name	Description
HOSTA 'ALBO MARGINATA'	Medium - Formal looking mound of green leaves with neat white margins.
HOSTA 'ALLAN P. MCCONNELL'	Small - Reaches 12" high and 24" in diameter. Dark green oval leaves with fine white to creamy margins . 1/2 Day sun to light shade
HOSTA 'AMY ELIZABETH'	Small - Neat mound with dark green margin and a gold center. Part shade
HOSTA 'ANTIOCH'	Large - Impressive green leaves with white margins. Pale lavender flowers in late July.
HOSTA 'AUGUST MOON'	Medium - Large - Textured golden foliage and pale lavender flowers in late July. A Hosta "classic". Part Sun
HOSTA 'AUREO MARGINATA'	Medium - Dark green leaves with neat narrow gold edges. Lavender flowers in July - August. Shade to Part Shade
HOSTA 'BLUE MOON'	Small - Reaches 6"-10" in height. Dense mound of intensely blue, deeply cupped foliage. Slug resistant. Flowers in June - August. Part Shade
HOSTA 'BLUE MOUSE EARS'	2008 Hosta of the Year Dwarf- Blue hosta. Very cute! Nearly round shape. Small pale purple flowers in July . Part Shade
HOSTA 'BRAVE AMHERST'	Medium - Rounded blue leaves are neatly edged in gold. Blooms nearly white flowers late June to early July. Part Shade
HOSTA 'BRENDA'S BEAUTY'	Medium - Stunning light gold centers and green margins. Blooms pale lavender flowers mid-July-early August. Part Shade
HOSTA 'CAT'S EYE'	Dwarf - Variegated - Well suited for a rock garden. 2" ovate leaves have a yellow center with green margins. Blooms pale purple flowers in July. Part Shade
HOSTA 'DARK STAR'	Medium - 18" Wide clump. Makes a perfect rosette of long, pointed, wavy, blue-green leaves with a wide creamy margin. Has lavender flowers . Part Shade
HOSTA 'DAWNS EARLY LIGHT'	Medium-Large - Brilliant Lemon-Yellow in spring. Heart shaped leaves that fade to chartreuse and are wonderfully ruffled and corrugated. Part to all shade
HOSTA 'DELTA DAWN'	Large - Chartreuse golden leaves surrounded by wide creamy margins. Light lavender flowers. Part sun for best color.
HOSTA 'DIAMOND TIARA'	Medium - 18" high by 42" wide. White-margined foliage. Blooms pale purple flowers mid-July-early August. Part Shade
HOSTA 'FRAGRANT BOUQUET'	Hosta of the Year 1998 Medium - Wide margin changes from creamy yellow to white by early summer, with a pale green center. Blooms fragrant lavender flowers from mid August to September. Part Shade
HOSTA 'FRANCIS WILLIAMS'	Large - A Classic. 22"High by 48"Diameter. Foliage is varigated with a blue-green center with golden margins. Blooms white flowers early summer. Shade
HOSTA 'GINKO CRAIG'	Dwarf - White - Margins surround a dark green center. Makes an excellent border. Bright purple flowers from early to mid-August. Shade
HOSTA 'GOLD DROP'	Small - Olive green to golden foliage. Purple flowers on short stalks. Good choice for edging. Part Shade
HOSTA 'GOLDEN FRIENDSHIP'	Medium - Textured chartreuse to medium gold colored leaves. Blooms lavender flowers in mid July. Part Shade with some sun for best color.
HOSTA 'GOLDEN PRAYERS'	Medium-Large mound of heavily corrugated golden foliage. Part Sun
HOSTA 'GOLDEN TIARA'	Medium - Very compact . Small light green heart-shaped leaves. Striking golden borders. Purple flowers in July. Tolerates wet soil. Part Shade
HOSTA 'GRACILLIMUS'	Dwarf - Edging type. Curly and wavy green foliage in a low mound. Part Shade

Name	Description
HOSTA 'GRAND SLAM'	Small - Medium - Has a classic mounding shape with thick glossy heart shaped leaves and red petioles. Part to all Shade
HOSTA 'GRAND TIARA'	Small - Bright gold margins and a dark green center. Blooms lavender flowers in mid-summer. Rapid growth. Part Shade
HOSTA 'GREAT EXPECTATIONS'	1995 Hosta of the Year Large - Leaves have blue-green margin with a gold center that changes to a creamy white by mid summer. Near white flowers mid July. Slug- resistant. Part Shade
HOSTA 'GUACAMOLE'	2002 Hosta of the Year Large - Chartreuse centered foliage. 24" high by 54" wide. Large, fragrant flowers that open in August. Part Shade
HOSTA 'GUARDIAN ANGEL'	Large - 28" high by 55" wide. Misted white and green leaf center surrounded by a blue-green margin; changes to dark green by mid - summer. Shade
HOSTA 'HALCYON'	Medium - Heavily ribbed blue leaves. Very attractive. Violet flowers on compact scapes. Slug- resistant. Part sun to light shade
HOSTA 'HAYDON'S SUNSET'	Small- Lime green mound. Great edger, florific. Part Sun
HOSTA 'JUNE'	2001 Hosta of the Year Medium - Yellow green leaves with darker blue - green margins. Compact scapes of soft lavender flowers. Part sun to light shade
HOSTA 'KABITAN'	Small - Long lanceolate lime green leaves with dark green stripes. Part to Full shade
HOSTA 'KATIE Q'	Medium - Leaves slightly wavy with dark green center and gold margins. Full and vigorous. Blooms pale lavender flowers in July. Part Shade
HOSTA 'KROSSA REGAL'	Huge - Vased shaped mound of powdery blue foliage. 5 foot scapes with lavender flowers. Part Sun
HOSTA 'LAKESIDE KALEIDOSCOPE'	Medium - 16" high by 40" wide. Near white flowers from late July to August. Creamy margins with medium green center and gray green streaks. Part shade
HOSTA 'LAKESIDE SPELLBINDER'	Medium - Narrow, creamy white center with a 2 1/2" wide dark green margin. Part Shade
HOSTA 'LIBERTY'	Medium - 2' Wide semi-upright clump. Thick dark green leaves are edged with a wide golden yellow dramatic border, changing to cream in the summer. Blooms lavender flowers early summer. Part Sun to Light Shade
HOSTA 'MARACHINO CHERRY'	Medium - Large - With green leaves on red stems. Blooms lavender flowers on red stems in mid to late summer. Partial Shade
HOSTA 'MONT. AUREO MARGINATA'	Large - Arching wedge shaped foliage. Gold margins with medium green center. Blooms very pale lavender flowers in July. Part Shade
HOSTA 'MOONLILY'	Small-Medium - 17"high x 36"wide. Rare - Golden Tokudama-type. Medium to bright gold foliage. Slug-resistant. Part Shade
HOSTA 'NEAT SPLASH'	Medium - Bright creamy margins. Fast growing. Blooms purple flowers in August. Tolerates wet soil. Part Shade
HOSTA 'NIGHT BEFORE CHRISTMAS'	Large -25" high by 63" wide. White-centered foliage; Sport of White Christmas. Blooms pale lavender flowers mid-July-early August. Part Shade
HOSTA 'OLIVE BAILEY LANGDON'	Large - Beautiful round leaves with gold margins. Glauca bloom (powder coating) on the leaf and displays it's variegated color later in the season. Part Shade
HOSTA 'ON STAGE'	Medium-Spectacular!! Bright yellow summer leaf center and irregular green margins. Part sun for best color
HOSTA 'PARADIGM'	2007 Hosta of the Year Large - Gold Leaves edged with blue-green. Blooms lavender flowers in summer. Part to Full Shade

HOSTAS CONT

Name	Description
HOSTA 'PARADISE POWER'	Large - Intense gold leaves with slight ruffling are displayed from a distinct vase clump. Leaves also have a green margin. Sun Tolerant
HOSTA 'PATRIOT'	1997 Hosta of the Year Medium-Large - Bold white and green leaves on a vigorous plant. Sun tolerant
HOSTA 'PAUL'S GLORY'	1999 Hosta of the Year Outstanding! Golden cream leaves with a dark green margin. Blooms pale lavender flowers mid-July-early August. Part Shade
HOSTA 'PISTACHIO CREAM'	Small - Unique Pistachio green leaves form a dense mound. Part Sun
HOSTA 'RADIANT EDGER'	Small - Height 12" and Diameter 24". Wide gold margin and green center. Lavender flowers. A colorful border plant. Part Shade
HOSTA 'RASCAL'	Medium - Large- Gold leaves and a darker margin. Blooms lavender flowers in July. Part shade and part sun for best color.
HOSTA 'ROYAL STANDARD'	Large - Bright green foliage. Many fragrant, white flowers make it a knockout in August. Sun tolerate
HOSTA 'SAGAE'	2000 Hosta of the Year Large - 30"high by 70" wide. Gold margins change to creamy white by mid-summer. Dark green center. Smooth texture. Slug resistant. Part Shade
HOSTA 'SERENDIPITY'	Medium - Neat mound of blue- green foliage. Blooms lavender funnel shaped flowers prolifically, late June into mid-July. Shade
HOSTA 'SIEBOLDIANA ELEGANS'	Huge - Awesome! Blue Hosta. A Classic. Blooms near white flowers in June-July. Full to Part Shade
HOSTA 'SNOW CRUST'	Large - Medium green with bright white edges. Blooms lavender flowers. Part Shade
HOSTA 'SO SWEET'	1996 Hosta of the Year. Medium - Blooms big, fragrant white flowers in late summer. Fast growing with white margins. Sun tolerant
HOSTA 'SPILT MILK'	Medium - 16"High and 24" Diameter. Foliage misted blue-green with white streaks. Has lavender flowers. A hosta that is very out of the ordinary. Part Shade
HOSTA 'ST. PAUL'	Medium-Large - Thick gold heart-shaped leaves are bordered by a wide blue-green margin. Part Shade
HOSTA 'STAINED GLASS'	2006 Hosta of the Year Medium- Large- Fast-growing hosta with bright gold in the center of the leaves. Blooms fragrant, white flowers in August. Part Shade
HOSTA 'STETSON'	Medium - Unusual crinkled foliage. Light lavender flowers. Green center with wide creamy yellow margins. Part Shade
HOSTA 'SUM-CUP-OF-JOE'	Large- Chartreuse center with thin white margin. Blooms pale lavender flowers late July-mid-August. Part Shade
HOSTA 'SUMMER MUSIC'	Medium-Slow growing hosta. Leaves have white center and green margin with yellow between. Part Shade
HOSTA 'SUN KISSED'	Medium - Chartreuse centered with white margins. Fast grower. Blooms fragrant flowers in July. Part Shade
HOSTA 'SUNLIGHT CHILD'	Dwarf - Shiny yellow leaves. Creates a tiny clump. Works well in a rock garden or trough. Blooms lavender flowers. Part Sun
HOSTA TOK. AUREO-NEBULOSA	Medium - Gold centered, blue margined foliage. Leaves pucker with age. Blooms near white flowers late June-early July. Slug resistant. Full to Part Shade
HOSTA TOK. FLAVOCIRCINALIS	Medium - Heavily corugated leaves have gold margins with a blue green center. Near white flowers from mid June to July. Part Shade
HOSTA 'TORTIFRONS'	Dwarf - A true collectors Hosta. Has dark green twisted leaves. Blooms pale blueish lavender flowers mid September. Shade

Name	Description
HOSTA 'VERONICA LAKE'	Medium - Gold margined, green centered foliage. Very nice plant. Part shade
HOSTA 'WHEATON BLUE'	Large - 26" high by 50". Wide blue-green hosta. Blooms wide pale lavender flowers in late July. Part Shade
HOSTA 'WIDE BRIM'	Medium - Large - 18" high by 45"wide. Creamy yellow-margined foliage. Part Shade
HOSTA 'WYLDE GREEN CREAM'	Small - 12" high by 30" wide. Dark green margin surrounding a bright gold center. Lavender flowers in July. Part shade

Note: We have about 140 varieties available, many in limited quantities. Please check for availability.

GRASSES

Name	Description
CALAMAGROSTIS ARUND. BRACHYTRICHA	2-3' tall. Foliage emerges a very rich green in color and over time fades to an amazing fall yellow in yes...you guessed it, fall. Flower spikes arrive in late Summer/early Fall and have a pinkish tinge.
CALAMGROSTIS X. ACUT. 'OVERDAM'	4-5' tall. Similar to 'Karl Foerster' in most ways, but comes with a beautiful variegated foliage.
CALAMGROSTIS X. ACUT. 'KARL FOERSTER'	4-5' tall. Forms a fairly tight clump up to 2' wide with time. It sports fluffy flowers on strong vertical stems, from June through September.
CHASMANTHIUM LATIFOLIUM	3' tall clumping grass. This plant is best used in multiples. The effect that this plant has when blowing in the breeze is quite beautiful. It's similar to being on a sailboat on a breezy day, just minus the boat. Common name for this plant is Sea Oats. The plant sports oak-like spikelets. An excellent plant for drying, it turns a beautiful bronze color, until the first heavy wet snow destroys it.
DESCHAMPISIA CESPITOSA	1-2' tall. Enjoys slightly moist planting locations. Blooms most readily in full sun. Excellent plant for the front of the grass garden or as a patio edger, and certainly along streams and ponds.
MISCANTHUS 'PURPURASCENS'	5' tall or so. Blooms early August in most years. It is the best grass for that Fall red/orange look. Biggest downfall is the lack of drought tolerance found in the other ornamental grasses, but then again there are many plants we continue to grow regardless of their lack of drought tolerance. Leaves are approximately 1/2" wide.
MISCANTHUS SIN 'ADAGIO'	4-5' tall Striking fountain-like foliage that is narrow and green Inflorescence open with reddish tints that turn silvery white.
MISCANTHUS SIN 'CABARET'	5-7' tall. Able to handle moister soils than some other cultivators. Not reliably hardy in zone 5, unless well sheltered. Leaves can be up to 1" wide and are beautifully variegated.
MISCANTHUS SIN 'GRACILLIMUS'	5-7' tall, providing the soils are not too moist or the plant too shaded. Tallest and boldest Miscanthus.
MISCANTHUS SIN 'GRAZIELLA'	5-7' tall. Slightly more upright than the 'Gracillimus'. Fall foliage is a striking rich copper/orange color.

GRASSES CONT

Name	Description
MISCANTHUS SIN 'MALEPARTUS'	5-7' tall. Similar in form to 'Graziella'; however, leaves are much wider. Flowers are a very fluffy white.
MISCANTHUS SIN 'MORNING LIGHT'	4-5' tall. The name Morning Light had to come from the shimmering foliage. However, if so, I might have called it 'Day Light', but then again maybe 'Morning Light' sounds better. Either way it is a striking plant with green foliage and white silvers. Seed heads are bronze red in October.
MISCANTHUS SIN 'STRICTUS'	6-8' tall. Very vertical grower. It has horizontal yellow bands across the green foliage and reddish blooms in mid-September or so.
MISCANTHUS SIN 'VARIEGATUS'	5-7' tall. Blooms appear in September and they have a reddish tinge to them. Plants are lush green sporting beautiful crisp white stripes along each leaf. It is the hardiest of the variegated Miscanthus.
MISCANTHUS SIN 'ZEBRINUS'	6' - 8' tall. Grows slightly more arching than 'Strictus'. Copper blooms in September. Green leaves have irregular spaced yellow striations.
MOLINIA CAERULEA ARUND. 'SKYRACER'	3' tall. Clump of green foliage with vertical inflorescence to 7-8'. Very architectural plant. Foliage turns to an amazing golden color in the Fall.
PANICUM VIRG. 'HEAVY METAL'	3-5' tall. Very rigid upright grower. Foliage color is a very metallic blue. Seed heads are very light and airy looking.
PANICUM VIRG. 'ROTSTAHLBUSCH'	4' tall. Leaves sport amazing reddish to copper/ orange color in Autumn. More loose textured than 'Heavy Metal'. It is an excellent plant to be planted in clusters, providing reddish "hints" even in Summer.
PENNISETUM ALOPECUROIDES	2-3' tall. Leaves less than 1/2 ". In early Fall the inflorescence appear in spike like racemes . Will tolerate some shade. This plant will reseed under ideal conditions say some sources.; however, very rarely do we see reseeding. Commonly called "Fountain Grass". The Pennisetums are a favorite for behind a water feature.
PENNISETUM ALOPECUROIDES 'CAUDATUM'	3-4' tall. Similar to Alopecuroides; however, has near white blooms.

Miscanthus sin 'Graziella'

Calamagrostis x. acut. 'Karl Foerster'

Pennisetum alopecuroides 'Moundry'

Pond Maintenance Tools

OA36303 — Pond Scissors
Reach into pond to cut off old foliage.

OA36304 — Pond Pliers
Reach into pond and grasp items.

Aquatic Potting Soil

- Prepackaged soil for planting aquatic plants.
- Similar to the clay loam we use here at the nursery.
- Be sure to use the appropriate aquatic fertilizer for what you are planting.

SSAPS — Available in 16 qt bags
